(10) مَوْجَعَةُ الْمَعْنَى حَرْفُهُ رَأْسُهُ وَمَوْجَعُهُ دَمْرَسُهُ .

The Tsunami disaster that the Maldives experienced on 26th December 2004 was interpreted in different ways by different people. Some people said it was a freak geological incidence. Some people said it was the wrath of the Almighty for our behaviour and conduct are not according to the principles that Allah has prescribed. Because of Tsunami we're going to see in many ways a "changed" Maldives. For example the post Tsunami Maldives will see many bigger islands inhabited. These islands will also have safety measures and would be known as "safe islands". We'll also see a lot of smaller, difficult islands abandoned and people willing to inhabit "safe islands". In addition to precautionary and safety measures, these islands will enjoy many resources and benefits that would make the lives of the islanders easier and more prosperous.
